

# Actionable Exposure Management for Financial Organizations

SOLUTION BRIEF

## Vulnerability and Exposure Management in Finance

Financial institutions face intense scrutiny when it comes to cybersecurity compliance – all while navigating fragmented tools and growing backlogs. Manual processes slow things down, audit requirements raise the stakes, and even small gaps in exposure management can carry outsized consequences.

Seemplicity brings order and speed to exposure management across the entire security stack. By streamlining how vulnerability findings are consolidated, routed, and resolved, Seemplicity's AI-powered platform helps financial security teams shrink backlogs, strengthen compliance, and cut time to remediation by up to 60%.

## Benefits for Finance Industry

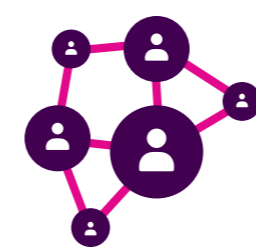

### AUDIT READINESS

Maintain records of vulnerabilities, remediation efforts, SLA tracking, and evidence collection – making audits faster and easier to pass.

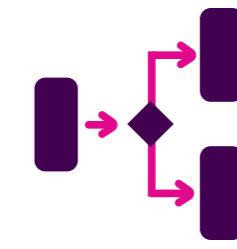

### PRIORITIZED FIXES

Prioritize remediation requests with AI Insights based on risk severity and business impact. Related issues are grouped with a focus on fixes that resolve multiple findings at once.

### UNIFIED VISIBILITY

Connect your scanners, ticketing tools, and stakeholders into one shared view so you can track progress, spot bottlenecks, and take action.

### AUTOMATED WORKFLOWS

Automate ticket creation, ownership, and routing to the right fixers, ensuring nothing slips through the cracks while teams and individuals remain accountable.

## How it works

Seemplicity's AI-powered Exposure Action Platform brings structure and speed to remediation across complex financial organizations. It consolidates findings from scanners, routes fix requests through ticketing systems, and tracks every step – from ownership to SLA compliance. Seemplicity turns fragmented efforts into a scalable, audit-ready process that reduces risk and satisfies regulatory requirements.

### Seemplicity Exposure Action Platform

The Seemplicity Exposure Action Platform fits into every step of existing exposure management processes with intuitive and innovative features. Whether consolidating findings, assigning ownership, or tracking SLA progress, Seemplicity brings speed, clarity, and control to every phase of remediation.
