

The **Agentic** Exposure Action Platform

SOLUTION BRIEF

Close the Gap Between Finding and Fixing

Security teams don't struggle with detection. They struggle with action. Seemplicity is your agentic Exposure Action Platform that closes the gap between findings and fixing. Without clear ownership and prioritization, exposures can stay unresolved. Seemplicity turns your scattered, individual findings into consolidated, actionable fixes. We do this by applying an agentic approach to automation to get the right tasks, to the right people, in the tools they already use.

Our AI agents are the first to proactively analyze business risk while applying automation to the aggregation, prioritization and remediation of exposure management. Only Seemplicity turns the overwhelming into clear, accountable tasks so you can reduce your exposure faster, with less effort and greater confidence.

THE SEEMPLICITY PLATFORM OFFERS

✓ Faster fixes, less friction

Cut through noise and automate tasks to save time and frustration, fix issues faster, and equip your teams to meet remediation SLAs.

✓ Visibility that proves compliance

Track progress, prove impact, and stay compliant (e.g., ISO, NIST, and SOC 2) without the scramble.

✓ Clear ownership, better execution

Remove ambiguity by routing tasks to the correct teams with context and detailed records, allowing for a smoother path to resolution.

✓ Stronger alignment across teams

Reduce back-and-forth with IT or DevOps, speed up fixes, and ensure you can demonstrate coordinated remediation when asked.

How it Works

Unlike traditional security posture tools or ticketing systems, Seemplicity doesn't just track —it drives resolution. Our agentic AI platform consolidates findings across scanners, prioritizes based on business risk, and routes fix requests into Jira, ServiceNow, and other native tools. Progress and SLA compliance are tracked automatically, giving organizations clear ownership, measurable risk reduction, and a shift from reactive vulnerability management to a proactive, scalable exposure action strategy.

The Seemplicity Agentic Exposure Action Platform fits into every step of existing exposure management workflows with intuitive and innovative features. Whether consolidating findings, assigning ownership, or tracking SLA progress, Seemplicity brings speed, clarity, and control to every phase of exposure management.
